Art Unit: 1745

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a first battery, classified in class 429, subclass 162.
  - II. Claims 7-11, drawn to a second battery, classified in class 429, subclass 176.
2. The inventions are distinct, each from the other because: Group II requires an exterior member having a recess for receiving the seal portion of the battery, which feature is not part of the Group I battery. In addition, the Group I battery includes a temperature detector and a heat transfer member, which elements do not form part of the Group II battery.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. Two telephone calls were made to George Repper on June 4 and 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
